TECHNICAL SKILLS

- JavaScript (ES6+)
- HTML5
- CSS3
- React.js
- Node.js
- Express.js
- PHP
- REST APIs
- Authentication System (JWT / Login System)
- MongoDB
- Firebase
- Supabase
- Git & GitHub

DEVELOPER TOOLS

- VS Code
- Postman
- Terminal
- Vercel
- Render
- Chrome Dev Tools

EDUCATION

Bachelor of Arts
Dr. Ram Manohar Lohia
Avadh University, Ayodhya,
Uttar Pradesh
2015 - 2018

PROFESSIONAL PROFILE

Full-Stack Software Engineer with 3+ years of experience in designing, developing, and deploying scalable web applications, SaaS products, and business solutions. Expertise in JavaScript, React.js, Node.js, MongoDB, REST APIs, HTML, CSS, and cloud-based deployment platforms. Experienced in building end-to-end applications, implementing authentication systems, database architecture, API integrations, and responsive user interfaces. Founder of RockClimb Networks, delivering web development, application development, hosting, and digital solutions for businesses. Successfully developed products including AI-powered interview preparation platforms, interactive developer tools, and ride-sharing solutions. Skilled in problem-solving, performance optimization, software architecture, and agile development practices. Adept at transforming ideas into production-ready applications while ensuring security, scalability, and exceptional user experience.

PROFESSIONAL EXPERIENCE

FOUNDER & DEVELOPER

APR 2024 - PRESENT

ROCKCLIMB NETWORKS PRIVATE LIMITED

- Building web applications and digital solutions using modern technologies.
- Developed and deployed websites and backend systems.
- Worked on backend systems, APIs, and database integration.
- Currently Building and scaling internal products and platforms.
- Working on service offerings including web development, hosting and app development.
- Managing end-to-end development from design to deployment.

PROJECTS

1. FOUNDER & DEVELOPER - DAYLI DELIVERY

FEB 2026 - PRESENT

- Building a quick commerce platform for fast local delivery operation.
- Developed admin panel for product and order management.
- Implementing backend system for users, orders and inventory.
- Working on scalable product listing and delivery system.
- Status (in development)

2. FOUNDER & DEVELOPER - SAFARSHARE

OCT 2025 - PRESENT

- Building a ride-sharing platform similar to BlaBlaCar with enhanced safety features.
- Developing ride booking system, authentication and admin dashboard.
- Designed system architecture for scalable ride sharing platform.
- Built using React, Node.js, Firebase and Supabase for Full-stack development.
- Status (in development)

3. InterviewIQ - AI INTERVIEW SIMULATOR

- Built and deployed an AI-powered interview preparation platform using React, Node.js, Express, and MongoDB.
- Developed secure user authentication, profile management, and interview tracking features.
- Integrated AI-driven interview question generation and personalized feedback workflows.
- Designed responsive and intuitive UI/UX to improve user engagement across desktop and mobile devices.
- Implemented REST APIs and database optimization for efficient data management and performance.
- Deployed the application on cloud infrastructure with CI/CD workflows for seamless updates.

4. Git-Visual

- Developed an interactive web application to teach Git concepts through visual commit graphs and hands-on learning.
- Built dynamic Git branch, merge, and commit visualizations to simplify version control concepts.
- Implemented an in-browser terminal simulator for practicing Git commands in a realistic environment.
- Designed a responsive user interface using React to enhance learning experience across devices.
- Developed backend services and APIs to manage user progress and interactive exercises.
- Deployed and maintained the application with focus on scalability, performance, and user experience.
